HYDRO-METEOROLOGICAL DISASTER IMPACT IN **UGANDA**

A SNAPSHOT (1st - 15th June 2020)

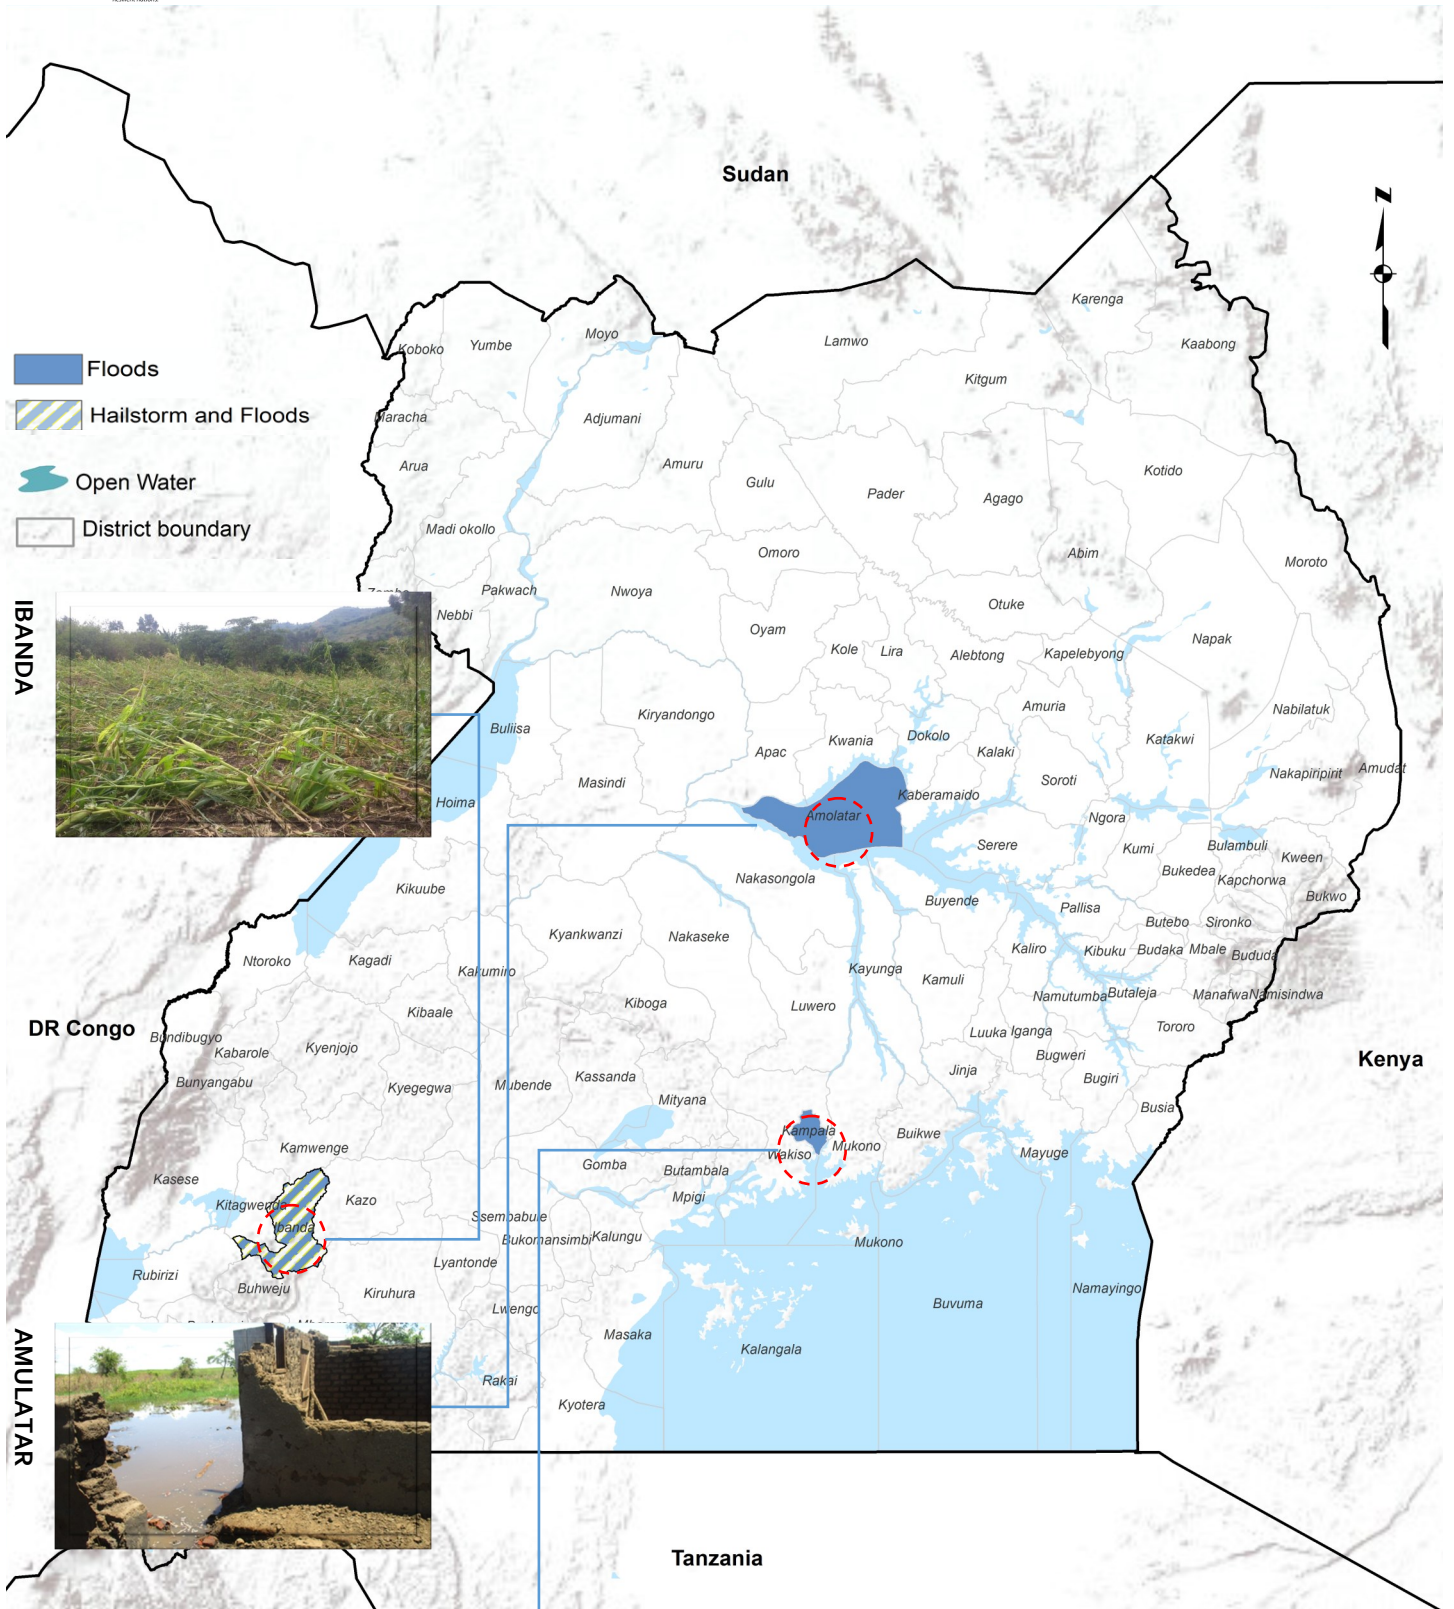

Source: MAAIF 2020

In recent months (January to May) Uganda has been suffering from hydro-meteorological disasters in over than 66 Districts.

- In early June, floods triggered by continuous rising of water levels of Lakes Kyoga and Kwana were reported in **Amolatar** district leaving lakeshores and adjacent seasonal wetlands submerged. Preliminary rapid assessment report indicated that approximately **7,930** people in **1,586** households were affected and at least **18** deaths recorded and damages to roads, houses, and crops.
- On June 10th 2020, in the urban areas of **Kampala**, 2500 households were reported affected by the rising water level in Lake Victoria affecting Port Bell and Panda pier villages in Luzira parish, Kirombe A and Kirombe B zones in Butabika parish, and Mutungo zone 12 in Mutungo parish.

- On June 13th 2020, **Ibanda** district (Ishongororo Town Council) experienced heavy rains with hailstorms, strong wind and floods. Approximately **2,780** people in **556** household were affected in **4** villages and 56 houses were destroyed. **563.5** acres in crops such as bananas, corn, cassava and coffee were estimated to be destroyed.

According to Seasonal Rainfall Outlook of June to August (JJA) 2020, provided by Uganda National Meteorological Authority, an increased likelihood of normal to above normal rainfall (enhanced rainfall) conditions over the northern, north-eastern and in most of the areas in the eastern region has been predicted. Flash floods are expected in Teso, Elegu border in Amuru district, and Karamoja subregion and mudslides over Elgon subregion.

IBANDA

AMOLATAR

KAMPALA

Event	Affected Household	Affected People	Dead	House Destroyed
 Floods	 4,642	 23,210	 18	
 Hailstorm	 556	 2,780		 56
